

**CURTISS -
WRIGHT**

We are pleased to introduce you to **Vlad Lyssenko**, who will be working as your **Condition Monitoring Services expert**.

Vlad's background is in Condition Monitoring, Six Sigma, and Continuous Improvement helping capital equipment owners with developing effective condition monitoring solutions, planning operational activities, and being more productive in day-to-day operations.

Please visit the **Curtiss-Wright FAMOS website** to discover how FAMOS (Fleet Asset Management and Optimization Solutions) can help your company with condition monitoring to optimize plant performance. We specialize in plant and equipment monitoring and detecting problems supported by best-in-class analytics and vast plant data anchoring your operation. You will also find the latest updates about software releases, trainings, industry events, and company news.

Get ready to network with your power industry peers at the **2023 Curtiss-Wright Plant Optimization and Plant Performance Symposium**. Presentations and discussions will focus on technology, data, and how subject matter experts using our core technologies can connect to find greater benefit and improve operation.
