

## **Curtiss-Wright Product Announcement StressWave NX Software Release**

**December 2021**

Curtiss-Wright is excited to announce the release of StressWave NX, the next generation update to the StressWave LX platform.

Drawing on customer feedback, this release presents a complete redesign of the user experience. The old Flash interface has been replaced with a modern, mobile-friendly interface that can be used on any modern browser from PC, tablet, or smartphone.

In addition, the new release builds on the solid StressWave foundation and introduces several performance optimizations that make data analysis faster than ever.

### **Software Enhancement Summary**

Outlined below is a summary of several of the major features of this exciting new software release. The combination of the new features and optimizations makes this release a significant upgrade. Curtiss-Wright strives to incorporate functionality recommended by our users, which delivers a business case for investing into the upgrade.

#### **Software Enhancements**

- Modern, mobile-friendly user interface
- Customizable dashboards for each user
- StressWave API for customers that desire custom data access
- New UEFI-capable installer
- Internationalization: per-user setting to display in English, German, Spanish, Italian, Korean, or Chinese (new languages can be added by request)

As we move ahead in making this software the industry benchmark for condition monitoring technology, we encourage you to provide feedback to drive enhancements and innovations. We look forward to working with you in the implementation of this upgrade and in demonstrating the value of StressWave technology.
